

# Introducing the Firebox® X UTM Software Suite

## Complete Security. Exceptional Value.

Turn your Firebox® X e-Series security appliance into a comprehensive unified threat management (UTM) solution – the best in its class – with the UTM Software Suite from WatchGuard. The suite includes powerful subscription-based security services that boost defenses in critical attack areas for maximum network protection.

## Inside the Firebox X UTM Software Suite

Everything you need for robust, multi-layered security is in one convenient package for streamlined setup and ongoing maintenance. An exceptional value, each suite includes:

### WebBlocker\*

Increase employee productivity, prevent legal liabilities, and protect against malicious attacks from rogue Web sites by controlling access to sites that host objectionable material or pose network or security risks.

### Gateway AntiVirus/Intrusion Prevention Service\*

For up-to-the-minute signature-based protection at the gateway to block spyware, viruses, trojans, buffer overflows, and SQL injections.

### spamBlocker\*

Best service in the industry at distinguishing legitimate communications from spam outbreaks in real time, blocking up to 97% of unwanted email regardless of the content, format, or language of the message – including image-based spam.

### LiveSecurity Service\*

WatchGuard's ground-breaking support and maintenance program provides hardware warranty with advance hardware replacement, concise threat alerts, rapid-response technical support and advice, software updates, innovative education resources, and more.

\*One-year renewable subscription

## Let the UTM Software Suite Simplify Your Life.

There's no easier way to have fully integrated, comprehensive network protection, with a team of security experts always there to back you up. Available for all Firebox X Peak, Core, and Edge e-Series security appliances.
